Grouping objects

science

Worksheet NO.1

Name :

Date :

Objectives: to learn how to group objects.

An object is a thing you can see or touch.

The Matter is anything that takes up space and has weight.

We can sort or group objects according to various properties like :
colour, size , shape and weight.

There are three states of matter :

1. Solid 2. Liquid . 3. Gas .

- A solid is a matter with a size and shape of its own.
They do not change shape when they are moved from one place to another.
- A liquid is a matter that takes the shape of the container .
A liquid is matter which has fixed size and variable shape .
- Both solids and liquid take up space and have a certain size.
- Gas is a matter which can change size and shape .
- Gas is a matter which take up space and has no shape of its own .
