Introduction to Internet Safety
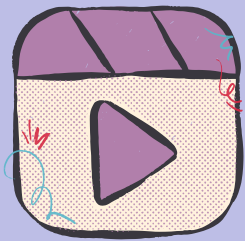

Simple Rules for Safe Internet Use

WHAT IS THE INTERNET?

World

The Internet is like a big world inside a computer where we can find information, play games, watch videos, and talk to friends!

PLAY

Why Do We Need to Be Safe on the Internet?

Just like we have rules to stay safe outside, we need rules to stay safe online!

Rule #1

## Keep Personal Information Private

Don't share your full name, address, phone number, or school on the internet. Keep it safe!

Rule #2

Talk to a Trusted Adult

If you see something on the internet that makes you feel scared or confused, tell an adult you trust right away!

Rule #3

Don't Talk to Strangers

Just like in real life, don't talk to people online that you don't know. Stay safe by only chatting with friends and family!

Rule #4

Be Careful What You Click

Don't click on strange pictures, links, or pop-ups. They might lead to something bad!

Rule #5

Ask Before Downloading or Installing

Ask an adult before downloading or installing anything on the computer or tablet.

Review: The 5 Rules

Let's review our safety rules:

- Keep your personal information private.
- Talk to a trusted adult.
- Don't talk to strangers.
- Be careful what you click.
- Ask before downloading.

Remember: You Are the Boss of Your Safety!
