

Title Let Wild Animals Be Wild	Claim “Release animals back into the wild where they belong ”.
Intended Audience People who care about animals .	
Reason “Returning wild animals to the wild is good for both animals and people .”	Facts and other supporting evidence “Wolves were reintroduced to Yellowstone National Park starting in 1995 and brought in tens of millions of dollars each year .”

Analyze how the reasons and evidence support the author's claim

The reasons are supported by statistics , such as 'tens of millions of dollars, and examples , such as the Siberian tracking project .These reasons and evidence about captive animals strongly support the author's claim about keeping wild animals wild .

Synthesize Information :

Details and supporting Evidence

Let Wild Animals Be Wild

“Specialists
carefully prepare
animals for life in
the wild before
releasing them ”

Don't Release Animals Back to the Wild

“ Scientific
research raises
serious questions
about the benefits
of releasing
animals into the
wild ”

<p>I think animals should say in the wild . The author makes a strong claim that the reintroduction of animals into the wild creates tourism . Money helps keep an area , such as yellow stone , safe . That means that animals in the wild will still be protected .</p>
