Social Studies	Unit 3 : Civics in Action . Lesson 1 : A Plan for a better Nation . I can analyze the preamble of the United States Constitution .		Unit 3 : Civics in Action . Lesson 1 : A Plan for a Better Nation . I can describe the principles included in the United States Constitution .		Study from your worksheets , notebook , and book . There will be an exam in : 1-Climate Solutions in Action Today .

IT

Students will learn how to organize raw data for better analysis using Microsoft Excel functions, utilizing sorting and filtering tools to structure information and present findings effectively.

Assignment: Creating and Validating Data in Excel

In this assignment, you will practice creating a drop-down list and applying data validation to cells in Microsoft Excel.

Instructions: Create a Drop-Down List: Open a new Excel workbook. Choose a topic (for example, types of fruits, countries, or car models) and create a list of at least 5 items for the drop-down menu. Create a drop-down list in a specific cell by following these steps: Go to the Data tab and click on Data Validation. Under the Allow section, select List. Make sure the In-cell dropdown option is checked. Under Source, select the range of cells that contain your list items. Click OK to finalize your drop-down list.

Apply Data Validation to Cells: Choose a set of cells where you want to apply data validation (e.g., columns for age, score, etc.). Go to the Data tab and click on Data Validation under the Data Tools group. Set the validation rules. For example: Allow only whole numbers between 1 and 100. Apply a rule to allow only text entries that start with a

		<p>specific letter or word. Test Your Work: Enter data in the cells with the drop-down list and the validated cells. Ensure that only valid entries are allowed. Try entering invalid data and see if the data validation settings trigger an error message. Presentation: Save your workbook and prepare a brief presentation to showcase your work. In your presentation, explain the steps you followed to create the drop-down list and apply data validation, and describe any challenges you faced during the process.</p> <p>quiz covering pages 61-67</p>			
PE			<p>Presentation of the PowerPoint in front of the students inside the classroom.</p> <p>The student is required to prepare a project (PowerPoint presentation) about the volleyball skills of the underhand reception and the underhand serve, and present it on screen in front of the class. The student may use the internet to research the technical steps of each skill and include them in the PowerPoint in an organized manner, along with some illustrative images. This project is graded out of 10 marks.</p>
